Recessions and Depressions Aren't So Bad - Investopedia

The Great Depression of the late 1920s and '30s remains the longest and most severe economic downturn in modern history. Lasting almost 10 years (from late 1929 until about 1939) and affecting nearly every country in the world, it was marked by steep declines in industrial production and in prices ...

Causes of the Great Depression | Britannica.com

Changes in the brain. It's complicated, and there are multiple causes of major depression. Factors such as genetic vulnerability, severe life stressors, substances you may take (some medications, drugs and alcohol) and medical conditions can affect the way your brain regulates your moods.

What causes depression - beyondblue - Home

The idea that reduced capital investment was a cause of the depression is a central theme in secular stagnation theory. Keynes argued that if the national government spent more money to help the economy to recover the money normally spent by consumers and business firms, then unemployment rates would fall.
